Due	Dec 19, 2014 5:00 pm
Accept Until	Dec 19, 2014 5:00 pm
Modified by instructor	Nov 5, 2014 8:03 am
Student Submissions	Non-electronic
Grade	Points (max 1.0)
Alert:	Yes
Honor pledge:	Yes

Assignment Instructions

You will receive an email inviting you to participate in a survey. The survey is intended to gauge your confidence in your ability to apply testing methodology and technology as of the end of the course; we will compare it to what you submitted for the initial survey, and the hope is that you have better understanding at the end of the course than you did at the beginning (but please do not pretend you do if in fact you don't, we need to know that too). Your assignment is to complete this survey. The assignment will be graded P/F (i.e., 1 or 0). If you answer seriously, you will pass. If you do not respond, or provide nonsense answers, you will fail. Please do not claim high confidence in using testing techniques that you have never heard of before and you just now queried on google, that would be considered a nonsense answer.
