	Assignment Instructions

Form a team of *exactly* four students, subdivided into two pairs of two students each. Make up a name for your team (you can change this later); your team name must consist of plain ascii characters and be suitable for public announcements.

Submit a single file listing the team name and the full names and uni's of all four students, with an indication of which two students constitute one pair and which two constitute the other pair (we do not really care if you switch pairs later, as long as you stick to the team and there are indeed two pairs, not a triplet and a onesie). Only one member of each team should submit. Submit as soon as your team is formed, you do not need to wait for the deadline.

If by class time (10:10am) on the due date you do not have a team of four, ask for help at the beginning of class and we will arrange teams during class time. Ask for help if you have no team at all, or have a team of only 2 or 3. Please do not form a team of 5 or more (the teaching staff will arrange such a team if needed due to enrollment). Do NOT wait until the end of class, when everyone is leaving, to ask for help.

This assignment is graded P/F (1 or 0). If you participate in submitting a team composition document of exactly four students, or ask for help at the very beginning of class time (whether or not we can really find you a team by the end of class), you will pass. Otherwise you will fail.
