Student Submissions	Non-electronic
Grade	Points (max 1.0)
Alert:	Yes
Honor pledge:	Yes

Assignment Instructions

You will be asked to participate in a survey intended to gauge your pre-existing familiarity with testing methodology and technology; there will be another such survey near the end of the course, and the hope is that you will have higher familiarity at the end of the course than you do at the beginning. Your assignment is to complete this survey. The assignment will be graded P/F (i.e., 1 or 0). If you answer seriously, you will pass. If you do not respond, or provide nonsense answers, you will fail. Please do not claim high familiarity with testing techniques that you have never heard of before and you just now queried on google, that would be considered a nonsense answer.

Although your team composition assignment is due the same day at the same time, please do not discuss the survey questions or answers with your teammates. Claiming that you have experience with some testing technique that you've never tried just because one of your teammates used it at a summer internship is another example of a nonsense answer that we will eventually detect, and retroactively revise your grade on this assignment accordingly.
