Date created	Aug 7, 2014 1:19 pm
Open	Aug 28, 2014 12:00 pm
Due	Sep 16, 2014 5:00 pm
Accept Until	Sep 16, 2014 5:00 pm
Modified by instructor	Sep 9, 2014 11:55 am
Student Submissions	Inline and Attachments
Number of resubmissions allowed	Unlimited
Accept Resubmission Until	Sep 16, 2014 6:00 pm
Grade	Points (max 100.0)
Alert:	Yes
Honor pledge:	Yes

Assignment Instructions

The preliminary individual assignment is intended to check basic programming skills, analogous to what is expected at the end of a CS2 course. This assignment is required for any students on the "wait list" as well as students who are officially enrolled (a variant of this assignment is also required for students seeking a waiver, students intending to enroll in the course do <u>not</u> need to do the extra deliverables specified for the waiver). Students who fail should not take this course. Students with a borderline grade are encouraged to drop the course now and work towards bringing their programming skills up to speed, and then take this course later.

The details of the assignment are posted here. If you have any questions about the assignment, contact the Head TA, Riley Spahn (riley@cs.columbia.edu).

Submission Instruction:

Please submit your java play application in a file named <uni>.tar.gz. uni is your Columbia UNI. For example, if your UNI is ab1234, your should submit a file named "ab1234.tar.gz".

Your project structure should use your UNI as the root folder. Let's use uni "ab1234" as example:

ab1234

  --app

  --conf

  --project

  --public

  --any other directories/files your java play application needs.

Students who joined the class this week (9/8 or later) can submit up until next Tuesday (9/16).
